

In-depth review uncovers economical ways to compete

The pressure is intense. With ever-increasing competition, you know you should provide faster Internet, add HD channels, introduce IP video—in short, deliver a top-quality customer experience. But how can that fit in your budget?

Let CCI help you evaluate your plant and identify ways to upgrade services, at a total cost that's probably much lower than you'd expect.

Investigation reveals opportunities

We start with a full-scale assessment of your headend, a field survey of your physical network and an in-depth look at your service offering. This "due diligence" reveals your plant status, current bandwidth use and opportunities to enhance performance and services.

Practical solutions control costs

We recommend a variety of options and procedures to make the most of your existing plant, and to upgrade as economically as possible. You benefit from CCI's extensive field experience; we know your challenges and can recommend down-to-earth solutions that fit your market and budget.

Insight prepares you for future

As part of our evaluation, CCI models service outgrowths and likely changes in network use. We combine this long-term outlook with our knowledge of consumer trends, network architectures and competitive services to help you develop a plan on what and when to change over the next several years.

Single source speeds implementation

Streamline your project with start-to-finish solutions. CCI offers expertise in network mapping and design; engineering and integration; construction and technical field services; and installation and training.

Due diligence deliverables

- Plant evaluation of each system
- Recommended system upgrades, with multiple options
- Recommended headend upgrades
- Recommended engineering specifications
- Detailed cost estimate, including engineering, labor and materials

We cover the full range of technology:

- All OSP gear – nodes, RF amps, cable
- CMTS
- All receivers/encoders
- RF optics
- Optical transport
- Antenna & Dish Farm
- IP Core & Access

Evaluations support acquisitions

Operators looking to acquire systems can turn to CCI for pre-purchase evaluations. We've evaluated thousands of miles of plant and can help you save time and money.

Do your due diligence with CCI

Let us show you how to stay on top of change and stay competitive—all at a cost that you can afford. Call CCI today: 855-337-9299.
