

## Rely on CCI for safety, know-how and results

Ensure your aerial or underground network construction progresses smoothly and safely. Work with CCI's experienced, top-rated crews on projects covering one mile to thousands of miles.

### **Aerial expertise starts with experience**

We've been building aerial broadband plants for more than 50 years. Many of our project supervisors have 20-plus years of experience, starting as aerial linemen.

Whether you need fiber-to-the-premises, fiber interconnects, upgrades or new construction, CCI delivers. Our aerial capabilities include:

- Modified turnkey or labor-only projects
- Strand installation
- Lashing fiber, coax, twisted pair
- Overlashing fiber, coax, twisted pair
- ADSS fiber installation
- Plant extensions and maintenance

### **Underground capabilities build on know-how**

Our underground construction experience spans more than 50 years, with CATV, telephony and municipal clients across the United States. CCI's project supervisors bring decades of experience in complex projects, varied soil conditions and tight schedules.

Our capabilities include:

- Labor-only to turnkey service, for projects of all sizes
- Trenching cable, fiber or conduit
- Plowing cable, fiber or conduit
- Directional and pneumatic boring
- Blow or pull cable/I.D. into new or existing conduit
- Complete restoration

### **Up-to-date equipment enhances efficiency**

Our aerial fleet includes top-quality, precision-maintained construction buckets and flatbed trucks. Underground construction equipment includes the most efficient plows, backhoes, trenchers, and directional boring equipment, vacuum excavators and fiber optic blowers. All working to keep your project on time and within budget.

### **Safety emphasis minimizes downtime**

Both aerial and underground crews are rigorously trained and monitored to prevent accidents and minimize downtime. Underground crews coordinate with your state's "one-call" system and utilities whenever they dig. CCI invests in safety equipment, training, pre-employment background checks and testing. Our safety policies include daily equipment inspection, weekly safety meetings, onsite audits and regular site reviews.

### **Call now to get started**
