

Network Integration Group keeps you on top of technology change

Make today's leading technologies part of your network—and stay prepared for tomorrow, with expert guidance from CCI Systems.

Gain not only components, but solutions

Our experienced engineers help you look beyond isolated equipment needs to understand your business challenges and the effect of change on your network. Leveraging our contacts at numerous manufacturers, we can combine a variety of equipment and technologies to create a custom, cutting-edge solution. And we ensure smooth integration through interoperability testing on site or in our lab.

Enjoy single-source ease

Everything you need to optimize your new or existing network is here: consulting, analysis, design, integration, configuration, training and material sales. CCI offers you frank assessments and manages the project to keep it on schedule and within budget.

Benefit from industry partnerships

Cisco Systems, Motorola and Harmonic are among CCI's many industry partners. We hold numerous certifications, including Cisco Service Provider Technology Partner and Cisco Authorized Service Provider Video Partner (both invitation-only). Our professionals continually train and pursue additional certifications, bringing you the benefits of up-to-date insight into state-of-the-art technology.

Make one call—to CCI

With satisfied customers across the U.S. and around the world, CCI is your choice for carrier-class, turnkey network solutions. Build on our know-how to build a network that works for you today and tomorrow. Call our Network Integration Group now to discuss your project: 855-337-9299.
